Fabric

Softshell with fleece lining and TPU membrane.

Outdoor.

96% polyester
4% elastane
280 gsm

Lining.

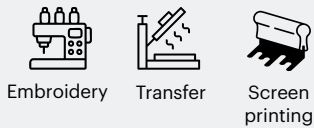

100% polyester
115 gsm

Washing instructions

Max temp. 30°C
Do not bleach
Do not iron
Do not dry clean
Do not use the dryer

Recommended printing techniques

Triple-layer Softshell Fabric

Technical fabric made up of three integrated layers that combine weather protection, thermal comfort, and freedom of movement:

Outer Layer:

Elastic polyester fabric with DWR (Durable Water Repellent) treatment, acting as the first barrier against wind, water, and abrasion.

Middle Layer:

Microporous TPU membrane that provides water and wind resistance while maintaining high breathability to allow body vapor to escape.

Inner Layer:

Inner fleece lining that offers thermal insulation and softness, ensuring comfort in cold climates.

Water Resistant

Resists water penetration and repels it under light rain or splashes.

Breathable

Evacuates water vapor ensuring efficient thermal regulation.

Windproof

Prevents wind from passing through, helping to maintain body temperature in cold and windy conditions.

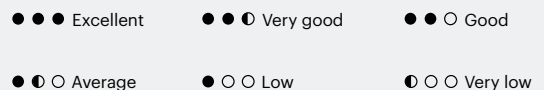

Elastic fabric that optimizes anatomical fit, provides greater freedom of movement, and enhances comfort.

Pilling Values

4-5

Pilling: measures the fabric's resistance to abrasion on a scale from 1 to 5. The higher the value, the greater the resistance.

Certifications

Garment certifications

EN 20471

3

Highest level of visibility. Suitable for work in high-risk environments such as airports, highways, or other traffic areas with speeds over 60 km/h, and in adverse weather or low-visibility conditions.

ISO
13688

Quality standard regarding ergonomics, safety, size designation, aging, compatibility, and marking of protective clothing (P.P.E.)

Velilla Group certifications

Management system that allows the company to control its environmental aspects.

Certified by AENOR ISO 14001
GA-2023/0227
